### Professional Summary

Detail-oriented Data Analyst and former Operations Executive with extensive experience in transforming unstructured, multilingual business ledgers into clean, structured datasets. Proficient in Python (Pandas, NumPy, Matplotlib, Seaborn) and advanced SQL workflows, with a proven track record of conducting rigorous financial audits, root-cause analyses, and building end-to-end data pipelines for actionable business intelligence. Certified by Google in Data Analytics, possessing dual Master's degrees in Mathematics and Physics.

### Experience

- Desi Farm (SMC-Private) Ltd Kharian, Pakistan  
Chief Executive Officer & Operations/Data Manager 2016 – 2025

Directed full-scale commercial agricultural operations, managing herd lifecycles, resource allocation, and multi-year asset ledgers.

Digitized 7 years of raw, unstructured financial ledgers (2019–2025) into clean, analysis-ready datasets using advanced spreadsheet and data structuring techniques.

Spearheaded a comprehensive financial and operational audit, separating daily operational cash flows from livestock capital trading profits to uncover true enterprise net margins.

- Upwork / Freelance Remote  
Data Analyst 2026 – Present

Conduct comprehensive data cleaning, wrangling, and formatting for global clients using Python and advanced Excel workflows to resolve structural anomalies in messy datasets.

### Projects

- Desi Farm Financial Audit Case Study | Python, Pandas, Matplotlib

Audited 7 years of raw operational ledgers (2019–2025) to separate cash flows from capital gains.

Evaluated operational efficiency via the Milk-to-Feed Ratio (83.2% cost impact) and performed rigorous Root Cause Analysis utilizing FAO and NRC dairy management benchmarks to diagnose procurement inefficiencies.

- Cyclistic Bike-Share Case Study | Python, Pandas, Matplotlib

Processed 6.1M+ rows across 12 monthly CSVs to uncover usage patterns between casual riders and annual members, delivering actionable data-driven marketing recommendations.

### Technical Skills

- Data Processing & Analysis:** Python (Pandas, NumPy, SymPy), SQL (MySQL, PostgreSQL), Microsoft Excel, Google Sheets.
- Data Cleaning & Structuring:** VLOOKUP, Pivot Tables, Data Integrity, Exploratory Data Analysis (EDA).
- Business Operations:** Financial Reporting, Inventory Management, Cross-functional Leadership, Touch Typing (60 WPM).

### Education

- Coursera Online  
Google Data Analytics Professional Certificate 2026
- FUUAUST Islamabad, Pakistan  
Master of Science (M.Sc.) in Applied Physics 2013
- University of the Punjab Lahore, Pakistan  
Master of Science (M.Sc.) in Mathematics 2009
